Speaker: Prof. Dr. Zameel Cader

Title: 'The use of stem cells for the study of neurodegenerative diseases (tentative)'

Abstract:

To be updated

Biography:

Dr Cader's research focuses on understanding the mechanism underlying neurogenetic disorders such as migraine and nerve degeneration. He is Director of the [Oxford Headache Centre](#) and of [StemBANCC](#), a major public-private partnership aiming to develop the resources and expertise for successful drug development on a stem cell platform. He is also a practising consultant neurologist at the John Radcliffe Hospital.
